

FINAFOG-600

DESCRIPTION	:	High Performance Antifog additive for Polyethylene		
SPECIFICATIONS	:	Appearance	:	Powder
		Melting Point	:	60 ± 5°C

(Slight variations in the specifications stated due to raw materials and production conditions are possible though they have no influence on the application properties described.)

APPLICATIONS	:	 Antifogging additive for food wrapping / agricultural films like green houses, large domes, small tunnels etc. 	
PROPERTIES	:	 FinaFog-600 acts as an excellent & effective AntiFog additive for PE film 	
		 It converts water droplets formed on the film into a continuous transparent water layer 	
		 Performance of PE films does not get affected due to the addition of FinaFog-600 	
		- It is compatible with PE	
		- Suitable for Cold & Hot fog applications	
<u>USE LEVEL</u>	:	0.75% - 5.0% depending upon the requirement.	
<u>STORAGE</u>	:	It can withstand at least up to one year, if stored properly under standard storage conditions. It is recommended to store FinaFog-600 at room temperature.	

The e recommendations in this bulletin are made without guarantee since the conditions of use are beyond our control. Users should make their own tests depending on machinery available and desired properties.
